FULL DESCRIPTION OF SITE (including topography, adjacent land use, access and boundaries etc.):					
c250-335m in altitude, entirely on valley side slope from valley floor to moorland edge. Emergent springs					
present.					
Part fenced, but open to moor above – grazed by sheep. Entirely surrounded by grazed land, including block of sessile oak (<i>Quercus petraea</i>) above. Mostly rough hill grazing, but valley floor flood plain below, with meanders and fen nearby. Access from 'dead end' road at Northern tip or by foot across river.					
Dry woodland is open – closed canopy stands with local mires, especially in NW and SE corners. Open stands very grassy, closed stands with sparse ground flora.					
Relic mining activity – adit with emergent stream. Possible foraging bats.					
Section(s) of the Wildlife Site Guidelines that this site qualifies under: H1) Woodlands (Wet woodland, Semi- natural upland mixed ash, Upland oak, H7) Marshy grassland (M23 Mires)					
Qualifying Habitat types: Woodlands, Marshy grassland
