### FULL DESCRIPTION OF SITE (including topography, adjacent land use, access and boundaries etc.):

The field is approximately 1.5 acres and lies adjacent to the drive to the house and alongside the road between Pencarreg and Kingcoed.

There are numerous planted native shrubs and trees on the eastern and southern sides of the field. The field, that slopes down to the road was partly enriched with much Cock's foot grass, Creeping Thistle, Hogweed and some docks but although quite rank with abundant Yorkshire Fog, the field still supported a number of good 'indicator' species such as Common Knapweed, Cuckoo flower, Lesser Stichwort, imperforate St John's-wort, and other interesting plants including Stone Parsley, Agrimony and Spotted Orchids.

Soft Rush was frequent in one damp area.
