WS/S030/01	Land West of Fairfield, Penperlleni	SO322049	2.00 ha	Species-Rich Neutral Grassland (MG5/6)	Species-Rich Grassland (HAP)	A group of fields on the south western edge of Penperlleni with a house and garden bisecting through in the middle of the site. The fields are relatively flat and have been cut for hay during the summer although re-growth has occurred. The fields are a mixture of MG5 and MG6 neutral grasslands with <i>Centaurea nigra</i> , <i>Lathyrus pratensis</i> and <i>Lotus corniculatus</i> in most of the fields. Several mature oaks remain in boundary hedges. To the west the site is bordered by the main road and to the east a housing estate. Broad leaved woodland lies to the north. A new barn is in field 1 area 2 in the corner. The whole site is possibly going to have a housing development on at some point. The survey info was obtained late in season and after hay cut and ideally spring/summer survey required for more detail.	H4 Neutral Grassland
