WS/SO30/12	St David's Churchyard, Trostrey	SO360044	0.37 ha	Neutral Grassland (MG5)	Species-Rich Grassland (HAP)	Trostrey Churchyard with MG5 Community. Indicator species include <i>Conopodium majus</i> , <i>Lotus corniculatus</i> , <i>Leontodon hispidus</i> & <i>Centaurea nigra</i> , which are frequent through a relatively closed, and in places rather grassy sward. <i>Lotus corniculatus</i> & <i>Leontodon hispidus</i> are locally abundant at the south of the site. Occasional <i>Narcissus pseudonarcissus</i> . The churchyard is split into a mown area and an uncut area on which the above description is based. The recently cut area appears to contain a similar frequency of indicators but with <i>Pilosella officinarum</i> present and a locally frequent bryophyte presence. Woodland flora in places with bluebell & dog's mercury.	H4 Neutral Grasslands
