WS/SO30/17	Oak Farm Meadow	SO393038	0.78 ha	Species Rich Neutral Grassland (MG5 a/c)	Species Rich Grassland	Small meadow to east of Oak Farm near Gwehelog. The site lies on the east & west facing moderate/steep slopes of a small valley. The steep east-facing slope is heavily encroached by bracken & bramble, although pockets of species-rich grassland exist. The west/north slope supports thick grassland with a good variety of species that are reasonably well distributed. The north-east of the site is richest, with frequent <i>Potentilla erecta</i> , <i>Pimpinella saxifraga</i> , <i>Stellaria graminea</i> , <i>Succisa pratensis</i> , <i>Stachys officinalis</i> and locally frequent <i>Dactylorhiza fuchsii</i> . <i>Luzula campestris</i> & <i>Plantago lanceolata</i> occasional. Site is surrounded by trees & scrub, including mature fruit trees at north end & south. Springs flow through and at north end of site.	H4 Neutral Grasslands
