WS/SO30/18	Moorlais Meadow	SO388040	0.87 ha	Species Rich Neutral Grassland (MG5)	Species Rich Grasslands (HAP)	Gentle east-facing slope with species-rich neutral sward that includes occasional and locally frequent <i>Dactylorhiza fuchsii</i> . Indicator species are well distributed and include <i>Centaurea nigra</i> , <i>Lotus corniculatus</i> , <i>Lathyrus pratensis</i> & <i>Conopodium majus</i> . An apparently artificially flattened area exists at the west of the site and consists of mown grassland. The area constitutes c.1/3 of the site. Indicators are still visible, but at much reduced frequencies. The site is surrounded by tall, thick species-rich hedgerows with standard trees. Species include oak elder, hazel, willow & holly. A stream runs along the eastern boundary, lined with alder. A public footpath runs across the site, maintained as a mown path.	H4 Neutral Grasslands
