SITE SUMMARY

SITE NAME: **Glenview Farm Bungalow**

GRID REF: **S O 3 8 0 0 4 9**

SURVEYOR(S): **Andy Karran**

SIZE (approx.): **0.86ha**

DATE OF SURVEY: **15th June 2020**

LOCAL AUTHORITY AREA: **Monmouthshire**

WARD: **Llanbadoc**

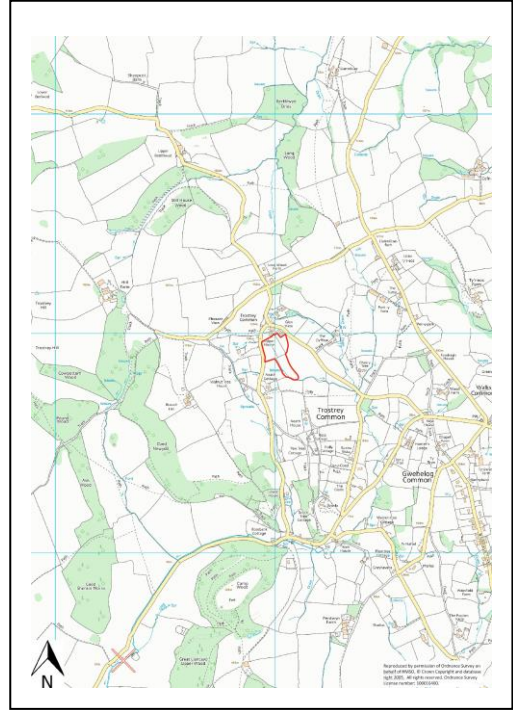

MAIN HABITAT TYPES PRESENT:

Habitat types	NVC type	Area (ha)
Species Rich Grassland		

LBAP PRIORITY HABITATS/SPECIES PRESENT?

Species-rich grassland

SKETCH MAP OF SITES LOCATION:

FULL DESCRIPTION OF SITE (including topography, adjacent land use, access and boundaries etc.):

A collection of five (Field 4 excluded from the LWS) fields that were until recently horse-grazed. The external boundaries of the site are native hedgerows, internally there is a mix of fence lines and hedging. As of 2020 the fields are now being managed as Hay Meadows, being “shut-up” and then cut in the summer, with the primary focus being to create/enhance the wildflower interest, some wildflower seed provided by GWT was sown in autumn 2020 subsequent to this survey. As a consequence of previous management the fields are still quite patchy as regards wildflowers, with some areas of quite rank grass, and also patches of thistles and some docks also. However, all fields have quite a number of indicator species present, including flowery/species-rich parts and are heading in the right direction. Fields 3 & 4 whilst far from being marshy grassland have a damper feel to them with scattered rushes. In contrast Field 5 is particularly dry and has an acidic element to it towards the SE corner. Red Clover, Lesser Stitchwort, Bulbous Buttercup and Field Wood-rush were among the typical and most numerous of the indicator species found. Also included within the LWS boundary is a strip of woodland which was quite diverse in terms of woody species, however it was contrastingly very species poor in herbs. The presence of Himalayan Balsam in proximity to the woodland should be noted.

Neutral Grasslands Indicators
 Field 1 = 9
 Field 2 = 7
 Field 3 = 7
 Field 4 = 5 (Not in LWS)
 Field 5 = 10
 13 Combined species recorded

Unknown

Describe the access to the site:

Accessed from garden of Glenview Bungalow.

Are there any public rights of way on the site?

No

If so please describe their location:

No

What is the current management at the site?

Previously had horses (former owners). Now is to be hay-cut and topping following by raking off. Himalayan Balsam control and Creeping Thistle control has commenced.

Are there any threats to the site?

If not cut, grass could become rank.

Are there any invasive species present?

Himalayan Balsam and Creeping Thistle is frequent in parts.

Are there any protected species present?

None known

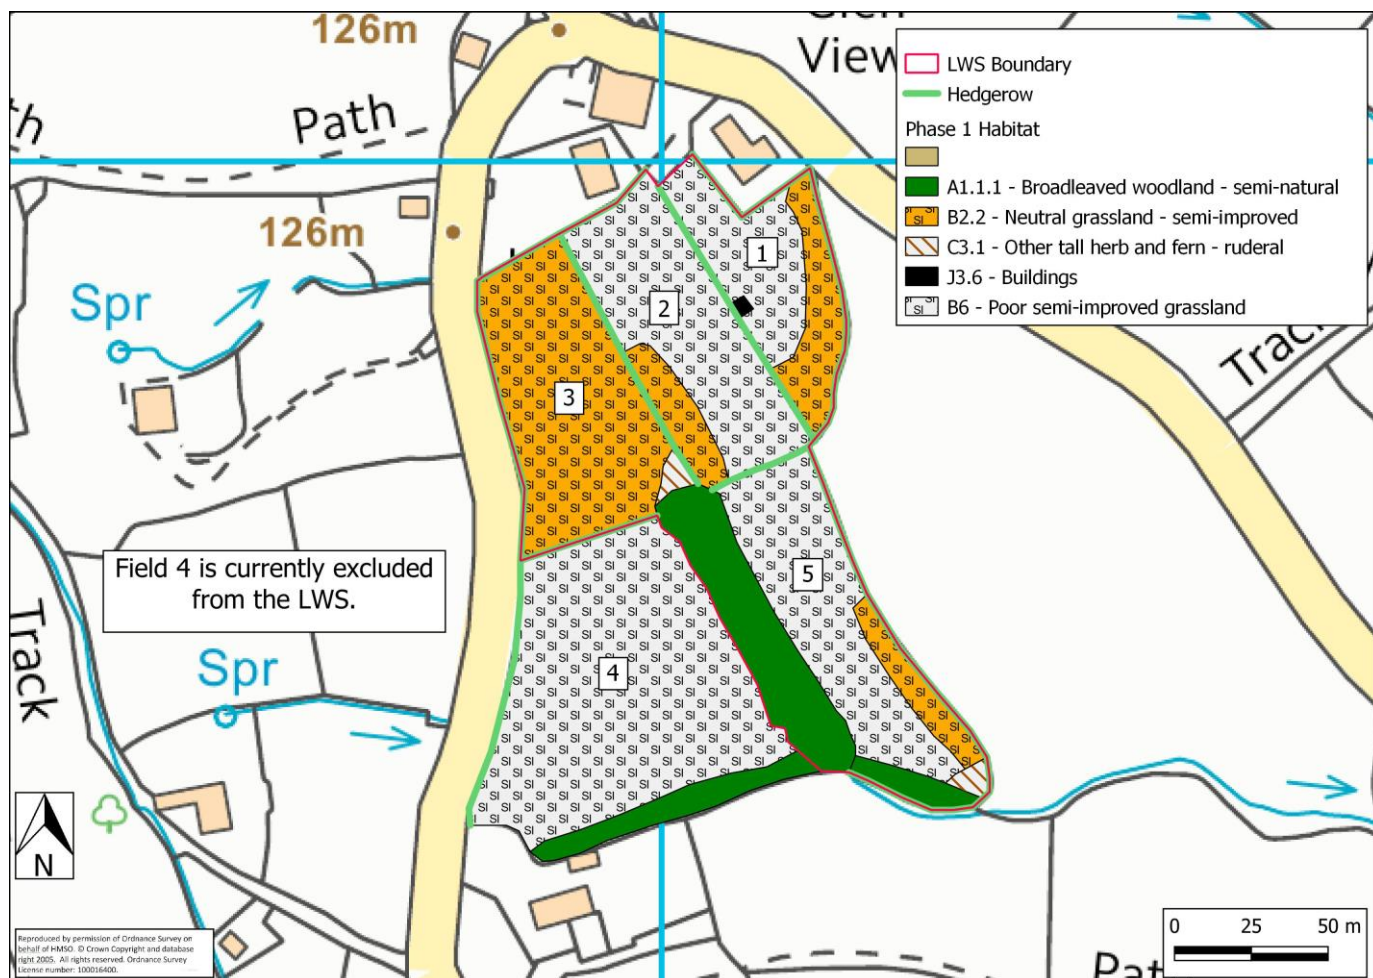

Please state the section(s) of the Wildlife Sites Guidance that this site qualifies under:

H4) Neutral Grasslands - over 8 indicator species. 9 in Field 1, 7 Field 2, 7 in Field 3 and 10 in Field 5 (13 Combined species recorded)
5 in Field 4, this is currently excluded from the LWS however.

Is the site part of any grant schemes? Yes No Grant Scheme:.....End date.....

Does the site already have any designations? Yes No Designation:.....

Key to colour coding of grassland species list

Species in **Bold** equals indicator species for Neutral grasslands (please note other species in list may be indicator species for other grassland types and these have been taken in to account when assessing overall value of the site).

Species in **Bold and underlined** equals a species from the contributory species list.

Key to abundances

D = Dominant

A = Abundant

F = Frequent

O = Occasional

R = Rare

Y = Yes (present)

Prefixs

L = Local/Locally

V = Very
