WS/SO32/02	Rose Cottage Meadow	SO387221	0.74 ha	Neutral Grassland (MG5 & MG6)	Species-Rich Grassland (HAP)	A lovely meadow, very uneven with a damp feel to it and some more acidic indicators but overall a neutral grassland. It has a variety of species including <i>Pimpinella saxifraga</i> , <i>Genista tinctoria</i> and <i>Centaurea nigra</i> throughout with <i>Filipenula ulmaria</i> and <i>Juncus articulatus</i> in damper areas. A ditched channel runs along the south western side and a trackway from the gate has at somepoint been dug out leading to some barns in the northern corner. The field is quite rank around the edges especially toward north western boundary. A section has been fenced off as a vegetable patch along northern side and a pond lies by the gateway. The field is surrounded by hedges and cattle grazed pastures that are relatively improved.	H4 Neutral Grasslands
