WS/SO40/43	Croft y Cloi Field	SO459094	1.05 ha	Species-Rich Grassland MG5/6	Lowland species-rich Grassland (HAP)	Large flat to gently undulating field. A small brook was present in the north-western corner of the field. The sward height was tall (40-50cm) at the time of survey. A large proportion of the field, particularly to the south-eastern half was tall, rank, tussocky grassland, However, there were more herb-rich patches where <i>Centaurea nigra</i> , <i>Lathyrus pratensis</i> , <i>Stellaria graminea</i> and <i>Lotus pedunculatus</i> were locally frequent. A large oak at the centre of the site was surrounded by tall rank grasses and nettles. In the south-east corner of the field bracken and blackthorn scrub were locally frequent. An area of dense scrub/overgrown hedgerow forms the south-western boundary.	H4 Neutral Grassland
