WS/SO40/51	Rockfield Farm	SO422010	0.32 ha	Neutral Grassland - Species Rich MG5	Lowland Species Rich Grasslands (HAP)	<p>Large field sloping (moderate) to south east. Main part of field comprising of abundant <i>Anthoxanthum odoratum</i>, <i>Holcus lunatus</i>, <i>Dactylis glomerata</i>, frequent <i>Centaurea nigra</i>, <i>Trifolium pratense</i>, locally frequent <i>Lotus corniculatus</i> and <i>Lathyrus pratensis</i>. Occasional Lesser Stitchwort and Field Wood-rush. In the south east corner there is a small stream/ditch with Hemlock Water-dropwort and a damp section with abundant <i>Filipendula ulmaria</i>. <i>Pteridium aquilinum</i> is encroaching from the hedgerow along the northern edge. The top part of the field to the north-west is disturbed and Docks and <i>Vicia sativa</i> were locally frequent. The field is directly adjacent to a busy road to the south-west and semi-improved pasture to the north and north-east. This field is cut once a year. Owners not really interested in wildlife site status, but were happy for survey to go ahead.</p>	H4 Neutral Grasslands
