WS/S04 1/04	Green Lawn Meadow	SO469100	1.87 ha	Neutral Grassland (MG5) Marshy Grassland Standing Water	Species- Rich Grassland (HAP)	A wet meadow situated on the main Monmouth to Raglan road that has recently had a drain put in, in the wettest part. The grassland is quite diverse with <i>Fillipendula ulmaria</i> , <i>Centaurea nigra</i> and <i>Lotus uliginosus</i> frequently found throughout. The field had a deep ditch in the centre that held water through the winter. This has recently been filled in with a pond left at the northern end with some remaining wet vegetation such as <i>Iris pseudacorus</i> , <i>Caltha palustris</i> and <i>Pulicaria dysenterica</i> surrounding the pond. Along the southern boundary is a ranker area with old fire sites and a pile of cut vegetation. The top part (the western end) nearest the gate has already been tipped and the remainder will be tipped soon with sheep following. Some planted trees are scattered along the southern boundary.	H4 Neutral Grassland
