WS/SO41/20	Pentre Wet Meadow	SO423108	0.59 ha	Marshy Grassland M23/M25	Species Rich Grasslands (HAP)	An unmanaged area of marshy grassland dominated by <i>Deschampsia cespitosa</i> , <i>Arrhenatherum elatius</i> and <i>Molinia caerulea</i> . Constant herbs include <i>Filipendula ulmaria</i> and <i>Lotus pedunculatus</i> which are frequent. <i>Vicia cracca</i> is occasional together with locally frequent <i>Lathyrus pratensis</i> and <i>Galium palustre</i> . <i>Angelica sylvestris</i> , <i>Eupatorium cannabinum</i> and <i>Centaurea nigra</i> . <i>Heracleum sphondylium</i> and <i>Urtica dioica</i> are scattered through the site together with <i>Cirsium palustre</i> . Due to lack of management the sward exhibits a thick grassy thatch. It is surrounded by Willow and Alder and dense bramble is encroaching from the margins especially at the south east near a small pond. Further encroachment threatens the site.	H7 Marshy Grassland
