WS/SO50/06	The Larches Meadows	SO527054	0.79 ha	Neutral Grassland (MG5 & MG6)	Species-Rich Grassland (HAP)	<p>The site is located in Pen-y-Fan and lies behind Pen-y-Fan Marsh. It comprises of 2 meadows cut for hay and 2 meadows horse-grazed and a small scrubbed-over marshy area over to the west. The 2 hay meadows are species-rich. Field 1 used to be one field but now is fenced in half with the lower bit grazed but appearing of similar quality. The field adjacent to the west (similarly to fields 1&amp;2) has a gradual southerly facing slope. It is overgrazed. In the north western corner is a fenced-off area that has some interesting wetland species and was perhaps once part of the site behind. Although landowners are keen on wildlife, horses have to graze and land provide some income. Field 4 is quite species-poor and is not recommended to be included in WS boundary.</p>	H4 Neutral Grasslands
