WS/SO50/09	Narth Farm Fields	SO527066	1.17 ha	Neutral Grassland (MG5) Neutral Grassland (MG6)	Species Rich Grassland (HAP)	Two field lying adjacent to one another with a north-easterly facing slope that becomes steeper the more you head to the north east. A public footpath runs from the south to the north along the western boundary. The fields are a mixture of MG5/MG6 dry neutral grassland, with field 2 more species rich. Field 1 is surrounded by thick hedging, and field 2 has a line of beech trees on the eastern boundary that are creating some shading of the grassland. There are species poor hay meadows to the west and grazed pastures to the east, and a track borders the top southern boundary. The tenant has been farming these fields for 25 years and lives at the Farmhouse to the west of the site.	H4 Neutral Grasslands
