WS/SO50/13	Stevenstone Meadow	SO500093	0.19 ha	Neutral Grassland (MG5)	Species-Rich Grassland (HAP)	A small triangular shaped meadow with a northwesterly facing slope. The meadow is very species-rich. The field is surrounded on 2 sides by roads and at the southern end by the owners garden. The western boundary is lined by a hedge that has been subsequently laid through funding from an LA21 grant. The eastern boundary is dominated by tall trees with a veteran oak included. The site is hay cut in July but no grazing takes places as field is not stockproof. The owner mows around the edges to prevent bracken spreading and a bonfire for garden rubbish is located at the southern end.	H4 Neutral Grasslands S7 Vascular Plants
