WS/SO50/68	Russens Meadow	SO531056	0.45 ha	Neutral Grassland - Species Rich MG5 and MG6	Species Rich Grasslands (HAP)	<p>The site comprises of a small hay meadow (0.3 acres) either side of the drive to the house and a nearby small (1 acre) pasture along the road. Site 1: The flora on the meadow was very diverse with a range of old meadow grasses and characteristic indicator species of unimproved grassland such as <i>Centaurea nigra</i>, <i>Rumex acetosa</i>, <i>Conopodium majus</i> and <i>Lathyrus pratensis</i>. The meadow lies either side of the drive, the edges are mainly short but the rest is allowed to grow until July/August. It is well drained and the soil is slightly acidic.</p> <p>Site 2: The small pasture is only about 200m away on other side of lane. This is used for grazing by a pony and is surrounded by tall hedges. There is more <i>Rumex obtusifolius</i> and <i>Urtica dioica</i> in this grassland but it still has a wide range of species</p>	H4 Neutral Grasslands
