WS/SO50/76	Wally's Field	SO515078	0.37 ha	Neutral grassland (MG5 7 MG6)	Species Rich Grassland (HAP)	<p>A small field with a north westerly facing slop and an old tumble down cottage which lies against the southern boundary. There is a fence that surrounds the cottage and in front the grassland quality shows this area was most likely originally part of the garden. The rest of the field however has a diverse flora, the eastern part has some broadleaved trees planted (4) recently and bees are also kept here. A tall hedge lines the northern boundary and a bank across the field shows where another has been removed. Planning permission has been sought for renovating the cottage but refused so far. The field has ben cut in the past, but this last year topped fequently. Adjacent lies an arable field intensively farmed and gardens to the south. The field was recorded as S1 poor in Phase I 1991.</p>	H4 Neutral Grasslands
