WS/SO50/80	New Grove Farm Meadows	SO501071	1.14	Species Rich Neutral Grassland	Species Rich Meadows, Hazel Dormouse, Pink Waxcap, Great Crested Newt	<p>New Grove Farm Meadows are owned and managed by Gwent Wildlife Trust as one of its Nature Reserves. It is located on a west-facing slope at an altitude of 240 m. The site is situated to the east side of the B 4293 road, 6 km south of Monmouth and 2 km north of Trellech adding great aesthetic value for the public.</p> <p>The meadow is made up of four adjacent meadows enclosed by mature hedgerows that form an important part of the landscape of the area. They lie within the Wye Valley AONB and represent the traditional farming methods once common in this area.</p> <p>To the southwest it is bordered by Fedw Fach, woodland owned by the Forestry Commission Wales. The site is neighboured by a further species-rich field to the north. Please note that survey information is only available for two meadows at this site, these are considered to be representative. The site also supports a rich grassland fungi population including <i>Entoloma bloxamii</i> and a variety of Hygrocybe species including <i>Hygrocybe pratensis</i>.</p>	H4 neutral grassland
