	Newton Court Farm Orchard (1)	SO521144	1.13ha		Veteran tree & traditional orchards	<p>The orchard is located within rough pasture that slopes downwards to the south. The orchard has been grazed up until recently (Sept 2014). It is bordered by wire fencing and hedgerows. The grassland is relatively species poor and quite rank. The orchard is well covered with fruit trees, which are all Apple. The apple trees are of a variety of ages but are all fairly old and well established. Veteran tree features are present in a number of the trees including dead wood in the canopy, and holes. Many of the trees are also festooned in Mistletoe. There are a small number of gaps in the orchard and whilst most are in good health (although in need of pruning) there are a small number of fallen and half dead trees. Fallen dead wood is largely left in-situ. The northern edge of orchard has been retained by vendor when land sold in 2014 but it is anticipated the whole unit will be managed as one by owners of the majority of orchard.</p> <p><i>Orchard:</i></p> <ul style="list-style-type: none"> • 5 or more cultivated fruit or nut trees, crown edges no more than 20m apart - Y • Being of a traditional structure which may currently be or have been managed in a traditional way - Y • Old trees plus two of the following - Y <ul style="list-style-type: none"> o Standing deadwood - Y o Fallen deadwood - Y o Cavities - Y 	H2) Parklands, Orchards and Veteran Trees – (Orchards)
