WS/ST49/20	Little Goytre Meadows	ST439976	2.97 ha	Neutral Grassland (MG5 a, c)	Species Rich Grassland (HAP)	<p>The site is located 3km NW of Gaerlwyd and straddles the B4235 at Little Goytre Farm and supports neutral hay meadows. The single large field north of the road gently slopes west towards Cook's Wood and was uncut MG5a and a single clump of <i>Genista tinctoria</i>. The main body of fields have recently been re-parceled into three smaller fields close to the road, and support MG5a grassland. All were recently cut. The southern-most fields contain species-rich MG5c with frequent <i>Potentilla erecta</i>, <i>Stachys officinalis</i>, <i>Lotus corniculatus</i>, <i>Succisa pratensis</i>, <i>Crex flacca</i> &amp; <i>Leontodon saxatilis</i>. The neutral grassland is characterised by <i>Leucanthemum vulgare</i>, <i>Lotus corniculatus</i>, <i>Hypochaeris radicata</i> &amp; <i>Ranunculus bulbosus</i>. <i>Juncus sp.</i> occurs locally in these fields. The site is bounded by low, mixed hedgerow with a new internal system of post-and-wire fences. The management of the site is for hay with aftermath grazing by alpacas.</p>	H4 Neutral Grasslands
