WS/ST4 9/44	Highbrow Field	ST448905	0.30h a	Neutral Grassland - Semi Improved MG5	Species Rich Grasslands (HAP)	Small field with slight NW facing slope, enclosed by tall hedged lined green lane at its south and west and low hawthorn dominated hedge at the east. <i>Primula veris</i> is frequent together with <i>Leontodon hispidus</i> and <i>Plantago lanceolata</i> . <i>Leucanthemum vulgare</i> and <i>Achillea millefolium</i> are occasional. Other indicators within the neutral grassland sward include <i>Centaurea nigra</i> , <i>Cardamine pratensis</i> , <i>Luzula campestris</i> , which are more locally distributed. Richness is greatest at the south of the field where <i>Carex spp</i> are present together with locally abundant <i>Ajuga reptans</i> . Along with other indicators <i>Bellis perennis</i> and <i>Taraxacum officinale</i> are frequent, but diversity of other herbs (as above) justifies consideration as WS.	H4 Neutral Grassland
