

## Sites of Importance for Nature Conservation in Merthyr Tydfil County Borough

SINC No	Site Name/s	Summary Description	Meets and/or Exceeds Mid Valleys selection SINC Criteria	Survey information
16	Taf Fawr (Cwm Taf Ffawr)	Section of major river tributary of the Afon Taf. The river extends into Brecon Beacons National Park to the north. Includes adjacent woodlands, which are relatively undisturbed in the upper reaches and more urban in character further downstream. The upper reaches in particular are of high ecological value, comprising limestone gorge woodland with a rich ground flora. Numerous rare plant species occur here. Further south the riverside woodland is more acid in character, but nevertheless supports a relatively diverse ground. The site also includes some adjacent areas of species-rich calcareous, neutral and acid grasslands. The calcareous grasslands in particular support numerous species which are scarce in the County Borough. Otter ranges along the Afon Taf Fechan, which also supports a range of native fish species including salmon.	H1, H4, H5, H6, H9, H15.  S2, S5, S6 & S7.	SO 00NW/11, David Clements Ecology Limited, April 2008. Resurveyed in July 2017 and SINC boundary retained.

Extracted from Merthyr Tydfil County Borough Council Replacement Local Development Plan (2016 - 2031).
