SITE OF IMPORTANCE FOR NATURE CONSERVATION

ROMAN WAY REEDBED

Site Description:

A small area of reedbed behind the LGV test centre off Neath Abbey Road. The mineral railway runs to the south of the site, with the Tennant canal the other side of it. There is no access to the site, therefore detailed species list or site description cannot be provided currently.

Qualifying features

H9:4 Reedbed

Important species

Species recorded: Common reed

Habitat suitable for: Cetti's warbler, Reed warbler, Reed bunting

Management Recommendations

Management may include rotational cutting of proportions of reed.

Last surveyed: 2019 Surveyor: LEP/MBP Author: WJL

To be read in conjunction with Wildlife Sites Guidance Wales (WBP 2008) and the NPT amendments. This area has been designated as a Site of Importance for Nature Conservation by Neath Port Talbot County Borough Council. This does not formally protect the site or place any restrictions upon the landowner. Neath Port Talbot Council's Countryside & Wildlife Team will endeavour to support and encourage activities that maintain and enhance the biodiversity interest of the land; where funding is available, funds may be provided to facilitate these activities. The information given is used to ensure that nature conservation is taken into account in planning decisions. The designation itself does not confer any rights of access to the site and places no restriction on the management of the land.
