SITE OF IMPORTANCE FOR NATURE CONSERVATION

KHARTOUM TIP

Site Description:

Former colliery site. Although it has had restoration work the high number of calcareous grassland indicator species indicates the underlying substrate is still strongly influenced by colliery spoil.

Qualifying features

H5:1 Lowland meadows 13/8
H6 Calcareous grassland 11/8

Important species

Species recorded: Slow worm, Common bird's-foot-trefoil, Common knapweed, Eyebright, Sheep's sorrel

Management Recommendations

Last surveyed: 2011 Surveyor: Hyder Author: LEP

To be read in conjunction with Wildlife Sites Guidance Wales (WBP 2008) and the NPT amendments. This area has been designated as a Site of Importance for Nature Conservation by Neath Port Talbot County Borough Council. This does not formally protect the site or place any restrictions upon the landowner. Neath Port Talbot Council's Countryside & Wildlife Team will endeavour to support and encourage activities that maintain and enhance the biodiversity interest of the land; where funding is available, funds may be provided to facilitate these activities. The information given is used to ensure that nature conservation is taken into account in planning decisions. The designation itself does not confer any rights of access to the site and places no restriction on the management of the land.
