O.S. Maps: 1:50,000 Sheet number: 170
1:25,000 Sheet number: SS 89/99

Site Area: 17.9 ha

Description:

A particularly good example of upland blanket mire which is now restricted to a relatively small number of localities in the coalfield uplands of the former county of Mid Glamorgan.

The mire is dominated by *Molinia caerulea* with a range of *Sphagnum* species which reflect variations in hydrological conditions throughout the bog. White beak-sedge *Rhynchosdora alba* is a locally rare species here found in association with *Sphagnum recurvum*.
